

BOWSHIEL FARM

Viewpoint 2 Southern Upland Way at Penmanshiel Wood

Existing View
This view looks out through woodland edge from the path that heads up into the woods from A1107, across the road from Pease Dean nature reserve. Trees sit in the foreground and provide the immediate context for users of the path, through which the low hills forming the skyline on the far side of the valley can be seen. Views in other directions are screened by trees and rising ground and when the trees are in leaf, this view is largely obscured. There is no view towards the Application Site from other nearby sections of the SUW.

Predicted Changes to Views
During early operation, the near edge of solar panels would be glimpsed as a thin line along the skyline to the far side of the valley, where gaps between nearby trees permit, and would not be particularly noticeable looking through the nearby trees. Once proposed mitigation planting matures, the solar panels would be largely screened by new hedgerows.

90° baseline panorama and photomontage or wireline
