

BOWSHIEL FARM

Viewpoint 5 A1 layby North of Grantshouse

Existing View
This view looks northwest along a valley from a layby beside the A1. The road is seen extending away along the base of the valley with steeply rising, forestry covered hills to the right of the road and more open and gently rising hills to the left. The more distant skyline seen looking directly along the road is formed by the vegetated valley sides and more open farmland on the low hills above. Looking the other direction along the valley, away from the Application Site, the views are very similar although gantries and power lines over the nearby railway line are also seen nearby.

Predicted Changes to Views
During early operation, solar panels would be seen extending across the more open areas of farmland seen on the more distant skyline along the road, dropping down towards the wooded valley sides with nearer woodland/trees partly screening some of the panel areas. Proposed mitigation planting would not notably reduce visibility of solar panels as it matures.

90° baseline panorama and photomontage or wireline
